

Big Wave Slides Backlink Playbook

The on-site work is done. This is the other half — the off-site presence that actually gets you ranked in Google and cited by ChatGPT & Perplexity. Work top to bottom. Every profile uses the exact same business details, byte-for-byte.

Before you start ~30 MIN

Gather everything once so you can paste it 20 times. This half hour saves you three hours.

- 1 Open a password manager note** (or a plain doc) to save every login as you go — you'll create ~20 accounts.
 - 2 Use one email for all signups:** `contact@bigwaveslides.com`. Consistency here helps verification later.
 - 3 Collect 8–12 real photos** — actual slides set up at events, your logo, delivery van if you have one. You already have product photos in the project; export a handful. Real photos beat stock every time for local trust.
 - 4 Have the Master Details below open in another tab** — you'll paste them everywhere.
 - 5 Decide your phone:** see the flag in the next section about the 614 (Ohio) number vs your Dallas HQ.
- ☐ Prep done — assets & logins ready

USE EVERYWHERE

This is your **NAP** (Name, Address, Phone). It must be **identical, character-for-character**, on every single site — "Ave" not "Avenue", same suite format, same phone format. Inconsistent NAP is the #1 thing that weakens local ranking. Copy these blocks; don't retype.

⚠ ONE INCONSISTENCY TO FIX

Your phone is **+1 (614) 302-5899** — a **Columbus, Ohio** area code — but your HQ is Dallas. A local (214 / 469 / 972) number reads as more trustworthy for a Dallas business and can help local ranking. Easiest fix: a free **Google Voice** Dallas number that forwards to your real phone. **If you keep 614, that's fine — but then use 614 everywhere with zero exceptions.** Pick one now and never mix.

AI "near me"

Free

- 1 Go to business.google.com → **Add your business**. Name: Big Wave Slides.
- 2 Category: **Bounce house rental service**. Add **Party equipment rental service** after.
- 3 When asked "Do you serve customers at your location?" choose **deliver / service-area business**. Enter your Dallas HQ to verify, then **set service areas** (Dallas + the cities you cover) and **hide the address** if you have no walk-in showroom.
- 4 Add phone + website (use the [/en/water-slide-rentals/texas/dallas](https://www.bigwaveslides.com/en/water-slide-rentals/texas/dallas) link or homepage), and your hours.
- 5 Start **verification now** (video call or postcard) — this is the step with a lag, so don't wait.
- 6 Fill the **"from the business"** description (paste the long one), add **10+ photos**, list your **services** (Water Slide Rental, Bounce House Rental, Combo Rental), and publish one **Post** ("Now booking summer 2026 — free quotes").
- 7 Seed **3-4 Q&As** yourself (ask + answer) using questions from your [/answers](#) page.

Tier 2 — AI citation engines

CHATGPT + PERPLEXITY

This is where AI referrals actually come from — ChatGPT cites **Reddit** and **Quora** heavily. These aren't "listings"; they're genuine participation. Start today, keep going weekly. **Value first, link second** — spam gets you banned and your links stripped.

9 • Reddit

Heavily AI-cited

Contextual link

- 1 Use/create a real account and **comment helpfully for a few days first** (build karma) — brand-new accounts dropping links get auto-removed.
- 2 Target subreddits: r/Dallas (+ other city subs you serve), r/daddit, r/Mommit, r/Parenting, r/partyplanning, r/eventplanning. Owner community: r/smallbusiness.
- 3 **Read each subreddit's rules** before posting — many ban promotion. When someone asks about party/water-slide rentals, give a genuinely useful answer and mention Big Wave Slides **only when it fits**.
- 4 Aim for a **9:1** ratio — nine helpful comments for every one that mentions your business.

WHY IT MATTERS

A single helpful Reddit thread that ranks can get you cited by ChatGPT for months. It's slow but it's the highest-quality AI signal there is.

Tier 3 — Easy citation directories

BATCH • ~90 MIN

Free business directories. Each is a citation (NAP consistency signal) and many give a real backlink. Don't overthink these — paste the same NAP + description + link and move on. Knock them out in one sitting.

REVIEW REQUEST – TEXT / EMAIL TO PAST CUSTOMERS

Hi [Name]! Thanks again for booking with Big Wave Slides 🌊 If the kids had a blast, would you mind leaving us a quick Google review? It genuinely helps a small business like ours get found. Takes 30 seconds: [your Google review link]. Thank you so much!

REDDIT / QUORA ANSWER – VALUE-FIRST TEMPLATE

For a backyard water slide, plan on roughly \$250–\$550/day for most residential units – and the good rental companies include delivery, setup, sanitizing, and insurance in that price, so there are no surprise fees. You'll want a flat area about 20 x 30 ft, a garden-hose spigot, and a power outlet within ~100 ft. Book 2–3 weeks ahead for summer weekends.

We run Big Wave Slides (nationwide delivery) so happy to answer anything specific – but honestly, whoever you use, ask them to confirm the price is all-inclusive and that they anchor and safety-check on site.

DIRECTORY "ABOUT" (SHORT) – REUSE ANYWHERE

Big Wave Slides delivers commercial-grade inflatable water slides, bounce houses & combos nationwide – set up, sanitized, and fully insured, from \$199/day. Free quotes, no online payment required.

Golden rules

DON'T SKIP

- 1 **NAP identical everywhere.** Same spelling, same format, same phone. One address, one phone, forever.
- 2 **Never fake reviews or mentions.** Google and Yelp detect it; it gets you filtered or suspended. Real reviews only.
- 3 **Value before links on Reddit/Quora.** Cold link-drops get removed and can ban the account — taking your links with them.
- 4 **Rotate link targets.** Point some links at city pages and /answers, not only the homepage — it spreads authority and looks natural.
- 5 **Real photos beat stock.** Upload actual event photos wherever you can.
- 6 **One profile per platform.** Duplicates split your signal and confuse Google.
- 7 **Verify what you can this week.** GBP + Apple have a verification lag — start them first, finish the rest while they process.
